

## Residential Carbon Filtration Systems

The Municipal Water Treatment Supplies in Southern California are heavily laddened with Chlorine, Ammonia and other related chemicals called disinfection byproducts. In fact, cities are monitored monthly for over 40 chemicals and 20 pesticides.

The EcoMax Carbon Filtration System installed on your homes drinking water will effectively reduce these harmful chemicals along with dirt, rust and sediment. It will provide fresh, clean, water for all or your drinking, cooking and ice making needs.

Each of our Carbon Filtration Systems are built to meet the individual needs and requirements of every home to assure proper flow rates without pressure drop.

*The EcoMax Carbon Filtration system uses ceramic filtration and the billions of pores contained in Activated Carbon to effectively reduce contaminants in water.*

### The EcoMax Exclusive Four Stage Filtration Process includes the following:

**Stage 1: Sediment Pre-filtration** - 10 micron sediment filter wrap removes large dirt particles, rust and sediment particles 4 times smaller than the human eye can see.

**Stage 2: Fine Sediment Pre-filtration** - Our exclusive ceramic outer shell removes extremely fine particles as small as .2 micron including cysts, giardia and even cryptosporidium and is silver impregnated to inhibit bacteria growth in the filter.

**Stage 3: Block Carbon Filtration** - Improves tastes and odors and reduces chlorine, VOC's (Volatile Organic Chemicals) and pesticides.

**Stage 4: Heavy Metals Reduction** - Effectively reduces heavy metals like lead and mercury

# Experience Great Taste & Peace of Mind

At last, great tasting, high quality water right at your fingertips. Not just for drinking, your Carbon Filtration System can provide many uses including:

- ◆ Drinking Water
- ◆ Ice Cubes
- ◆ Coffee & Tea
- ◆ Baby Formula
- ◆ Juices & other Beverages
- ◆ Weight Loss Programs
- ◆ Cooking
- ◆ Low sodium Diets
- ◆ Salt & Fresh Water Aquariums
- ◆ Potted Plants

## High Performance on Tap

The human body is made up of 73% water. For this reason, it only make good sense to drink only the highest quality water possible. Unlike traditional filters, The EcoMax Carbon Filtration System System reduces harmful chemicals and heavy metals that may be present in your drinking water while removing cysts and cryptosporidium. At Water Techniques, we not only filter your water, we care about it, too. That's why every EcoMax are carefully assembled and designed to ensure peak performance. The total solution for exceeding all your water quality expectations, A Water Techniques Carbon Filtration System will give you total confidence in knowing your family is getting the highest quality drinking water with the most efficient performance available.

## Specifications:

Micron Rating	0.2 Microns Nominal (98%)
	0.5 Microns Absolute (100%)
Cyst, Cryptosporidium & Giardia	100%
Chlorine > 95%	1500 Gallons @ 1.0 GPM
VOC's > 95%	1500 Gallons @ 1.0 GPM
Lead Reduction > 95%	1500 Gallons @ 1.0 GPM
Bacteriostatic	Silver Impregnated Ceramic
Filter Dimensions	3.125"O.D x 2.875"I.D. x 12.7" L
