3 Steps to a Complete Water Treatment System

1 Whole - House Filtration

Removes Chemical & Impurities From Your Incoming Water Supply

Automatic Multi-Media Filter

- Filtered water at every faucet for protection from chemicals, odors, tastes and impurities*
- Clean water for bathing and food preparation
- Effectively stops or reduces chemical absorption through skin and in lungs
- Multi-Media carbon based system with optional KDF prefilter

* May not be present in your water

2 Water Softening or Conditioning

Conditions Or Softens Hard Water For Benefits Throughout Your Home

Conditioner

Softener

WATER SOFTENING vs. CONDITIONING

Features/Benefits	Salt Free Conditioner	Softener
Reduces hard water scale build-up throughout the home	YES	YES
Protects and extends life of plumbing, water heaters, fixtures and appliances	YES	YES
Provides better results in the dishwasher and laundry with less soaps and detergents	YES	YES Significantly less soaps
Water Feeling Characteristics	Feeling unchanged	Smooth and silky, with enhanced lathering
Maintenance	Media replacement 4 years	Regular addition of salt or potassium
Installation Requirements	No Drain or Electrical	Drain & Electrical Required
Water Spotting	Spotting still occurs, but spots clean easily	Most effective for spot reduction
Base Technology	Template Assisted Crystalization	Ion-exchange

* The installation of a reverse osmosis drinking water system is recommended for persons with heart disease, hypertension, high blood pressure or a low sodium diet.

3 Purified Drinking Water
